Project 1: RSRTC (Rajasthan State Road Transport Corporation Mobile Ticket Booking Service)
Description: It is a Rajasthan State Government Project. The project includes design and development of an Android application for Bus ticket booking. It also has a web portal for users to view their ticket booking status and refunds. This portal has different roles i.e. Admin, Members, Accounts, MIS and Support. It consists of a wallet management system by which users can keep their money individually for booking purposes. All the reports are maintained on the web portal.
Technologies involved: ASP.Net 4.0 with C#, Web Services, LINQ, Ajax, Window Service

Project 2: EWallet System
Description: It is a system provided to users for their convenience to deposit the money with respect to the merchant. For this purpose, this system is integrated with Axis Bank through PAYU (Payment Gateway). This system also has the PCI-DSS Security for storing the data of user's Credit/Debit/Internet Banking. This system provides the facility to merchants for performing the transactions through us with secure user's card information. And on the other hand, it also facilitates the user to create an individual account with us to deposit the money in the wallet. This system will also have a portal to access the daily activities
Technologies involved: ASP.Net 4.5 with C#, MVC 5, Entity Framework, WCF, Web API

Project 3: TopMeNow BSNL Recharge Website and Mobile Application System (Officially BSNL Authorized)
Description: The interface of TopMeNow is designed to do hassle free Topup/Recharge/Bill payments of BSNL subscribers.
Technologies involved: ASP.Net 4.0 with C#, LINQ, Ajax, Web Services
